

# THE FIRST ECO-FRIENDLY MAN-MADE WAVE FOR SURFING SET IN A NATURAL ENVIRONMENT

## A REVOLUTION BASED ON A PATENTED TECHNOLOGY

Born in the French Greentech innovation ecosystem, **OKAHINA WAVE** is the **first man-made wave in a natural environment**.

A **floating atoll** that can be positioned in any existing body of water and generates **world-class surf waves** while having a **positive impact on the environment**.

A technology that allows any territory to develop its **own surf destination even far from the ocean**, a powerful driver for economic growth.

OKAHINA received **the Solar Impulse Efficient Solutions** label as one of the 1000 profitable solutions to change the world while respecting the planet.

# SURFING ACCESSIBLE TO ALL, ALL THE TIME, EVERYWHERE, AND SUSTAINABLE

## World-class surfing

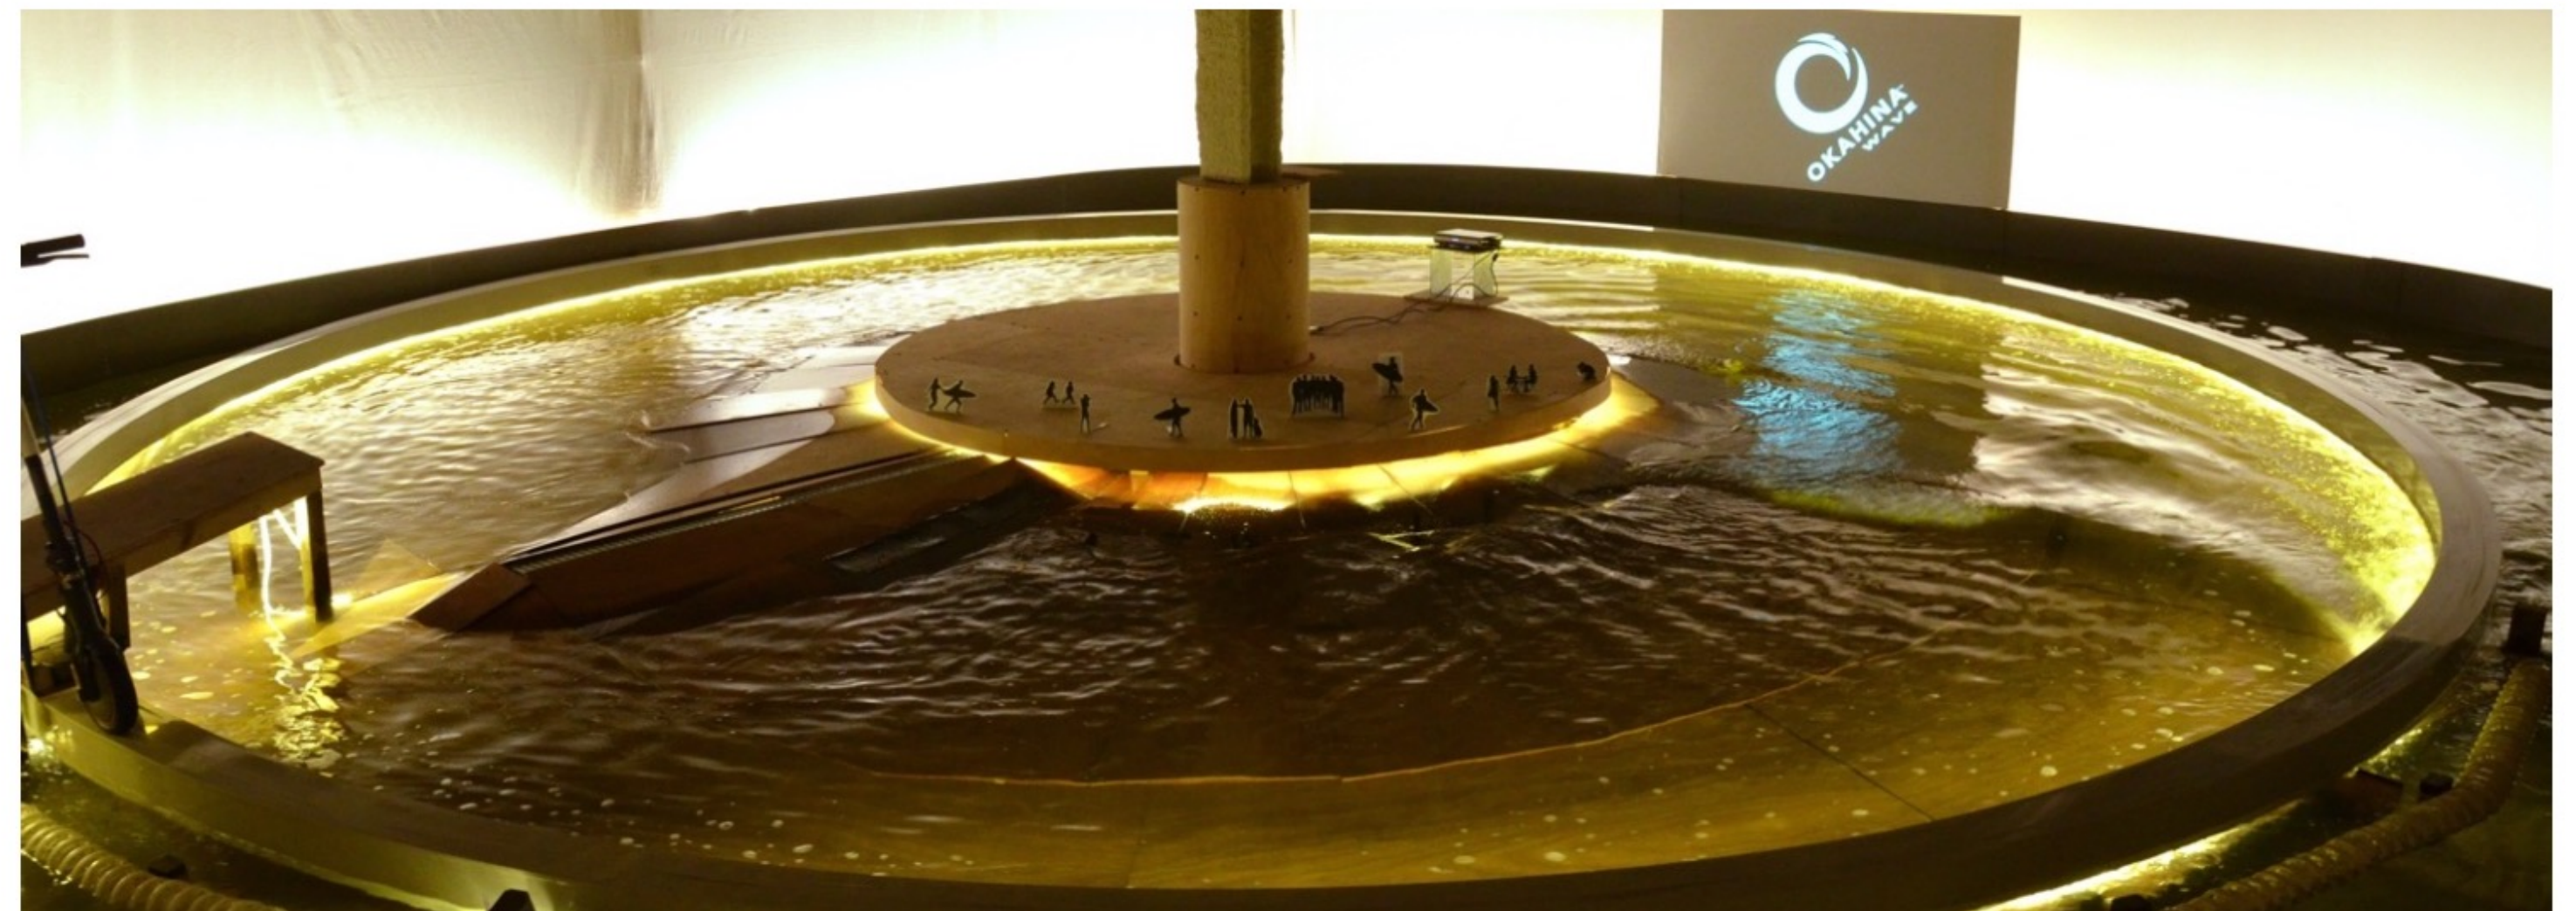

- ✓ More than 1000 waves an hour, for all levels, with the longest riding time on the market

## A positive impact on the environment

- ✓ No heavy construction, no concrete, no water, no soils artificialization and a low energy consumption
- ✓ Set up and dismantled with no impact
- ✓ Improves the biodiversity of aquatic environments: oxygenates stagnant water, filters micro-plastics, fish nurseries and bio huts

## Affordable and profitable

- ✓ An important economic driver for local communities
- ✓ A cost-effective and profitable business model with fast ROI

The first OKAHINA SPOT will open in France in 2024

# TRANSFORM ANY TERRITORY INTO A SURF DESTINATION

**SURF CAFÉ, SURF SHOP, SURF HOSTEL,  
EVENTS, CONTESTS...**

An entire **ecosystem of F&B, hospitality and retail experiences** built around the wave, that enhances and extends the surfing experience.
